

NetLicensing Pitch Deck

MOVE YOUR LICENSING TO THE CLOUD

Problem / Status Quo

NEW BUSINESS MODELS NEED A RECONCEIVED LICENSING APPROACH FOR DIGITAL ASSETS AND SERVICES

- ✓ Increasing trend of Software-as-a-Service (SaaS)-based applications evolves new opportunities for **licensing** and monetization
- ✓ Rethinking of old **perpetual** licenses and **switch** to the subscription-based models
- ✓ Feature-based monetization of fast-growing Internet of Things (IoT) market's
- ✓ Virtualization technologies have made already **complicated licensing** even more challenging
- Implementing in-house licensing solution significantly increases TTM and TCO, due to the additional R&D, infrastructure, and maintenance costs.

Solution

LICENSING-AS-A-SERVICE (LaaS)

solution which provides a cost-effective, integrated and scalable platform for independent software vendors. Which is helping to:

Simplify

license activation

Reduce

e-Commerce complexity for even most complex licensing models

Maximize

revenue with flexible licensing models

Automates

ISV processes thorough easy integration with existing CRM and ERP systems

Ease integration

on the broadest range of platforms – SaaS, virtualized environments, IoT, mobile, embedded and on-premise

Founding Team

Konstantin
Korotkov

Business Strategy
R&D

Konstantin is an engineering pro, originally from Belarus. After graduating from Belarusian State University, where he studied radiophysics, Konstantin moved to Germany. Having collected plenty of experience in world-wide distributed multicultural teams, big projects and production environments, he decided to begin an own entrepreneurial activity, and started a new project as an external project lead at Siemens.

After Alexey joined him in this project, they founded their own company – Labs64 GmbH. Now Konstantin captains the Labs64 engineering flagship. When he is not on the captain's bridge, you can find him in mountains.

Alexey
Averikhin

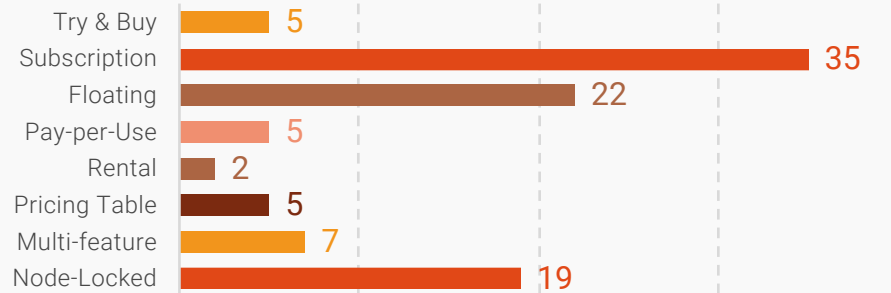

Business Development
Marketing and Partners

Alexey has an extensive background in IT including experience as a programmer, an architect, and a project manager. He studied technology process automation at the Krasnoyarsk Academy Of Nonferrous Metals And Gold, Russia, and gained experience in several major corporations.

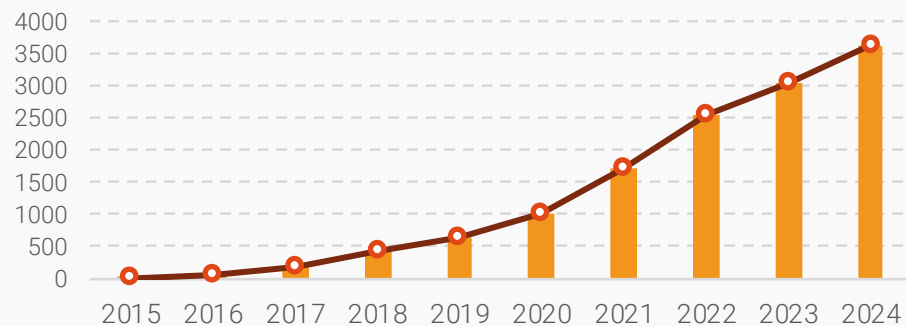

In his spare free time, Alexey is learning Italian and teaching his son Mac OS X. Va bene!
